SUMMARY

Aspiring Developer pursuing an MCA at Odisha University of Technology and Research, passionate about web development and user interface design. Eager to apply academic knowledge, explore new tools, and gain hands-on experience in creating effective web applications.

WORK EXPERIENCE

React Development Intern, WebDzen Technologies

Jul 2025 – Present

Developing and enhancing real-world React applications with clean, efficient, and well-documented code. Collaborating in weekly reviews to ensure alignment with client and project requirements.

PROJECTS

Movie Recommendation System

[GitHub Link](#)

Built a Flask-based movie recommendation system using movies.csv and credits.csv datasets. Applied cosine similarity on combined metadata (genres, cast, crew, keywords) to recommend similar movies. Integrated TMDb API for real-time details such as posters, ratings, cast, and director.

Currency Converter – JavaScript
